Professional Summary

I'm in Final year of B.Tech in Electronics and Communication Engineering at Sagi Rama Krishnam Raju Engineering College. I have strong communication skills, enabling me to work well with people and share ideas clearly. I quickly adapt to new technologies and am driven by self-motivation. I'm proactive, always eager to take initiative, and constantly improving my skills in a fast-changing environment.

Education

Sagi Ramakrishnam Raju Engineering College(A), Bhimavaram, AP, India.

B.Tech in Electronics communication Engineering

Relevant Coursework: Web technologies, APP Technologies

CGPA: 7.79 / 10.00

Sep 2023 - Apr 2027

Experience

Forntend Developer Intern at Vashatkaraa

April 2025 - Dec 2025

- Developed the mobile application frontend for a cross-border real estate platform, enabling US-based users to browse, list, and manage properties in India through intuitive and responsive user interfaces.
- Implemented user-centric UI flows including authentication screens, property listings, search and filters, and detailed property views, ensuring smooth navigation and an optimized mobile user experience.
- Optimized the mobile user experience by applying responsive layouts, reusable UI components, and efficient state handling to deliver a seamless and visually consistent app experience.

Projects

LANGUAGE NEST WEBSITE

[View project](#)

- Developed and deployed a full-stack web application using the MERN stack (MongoDB, Express.js, React.js, Node.js), providing dynamic user interaction and secure data management.
- Implemented responsive UI components in React.js, integrated RESTful APIs with Node.js and Express.js, and managed database operations with MongoDB for seamless end-to-end functionality.

SMART WATER BOTTLE APP

[View project](#)

- Developed a mobile application to track real-time water intake, manage personalized hydration goals, and display user progress through intuitive dashboards.
- Implemented IoT data handling and backend integration to process incoming data, enable smart notifications/reminders, and ensure seamless app synchronization.
- Created weekly and monthly analytical reports with visual charts and trends to enhance user engagement and promote consistent hydration habits.

CIVIC PULSE APP

[View project](#)

- Developed a civic issue reporting mobile application with secure authentication, onboarding, and personalized user flows, enabling citizens to report, track, and engage with community issues.
- Integrated machine learning models to automatically classify reported issues, assess severity, and recommend relevant issues to users based on location and interaction patterns.
- Implemented blockchain-based data management to ensure tamper-proof issue records, transparent status tracking, and trust in community voting and reporting processes.

Technical Skills

Programming Languages: C,Python,C++, SQL

Frameworks & Tools: React.js,React Native,Flutter, Node.js, Express.js, Git, GitHub, Postman,Figma

Databases & Cloud: MongoDB, MySQL, Firebase

Core & Professional Skills: Data Structures & Algorithms, Machine Learning, RESTful APIs, Problem solving, Leadership, Collaboration

Achievements

- **Google Student Ambassador** — SRKR Engineering College (Q4 2025)
- Volunteered in organizing wellness programs, sessions, and student engagement activities with the Art of Living
- Honoured as Excecutive Body of Institution of Electronics and Telecommunication Engineering — SRKREC
- Completed SoloLearn certifications in C and Python, strengthening core programming fundamentals.
- **HackerRank: Python (Basic) Certificate**
- **LeetCode** — Solved 250+ DSA problems (arrays, strings, hashing, recursion).
